

Ergonomic control station engineered for maximum operator comfort and ease of operation

Dynamic Load Diagram

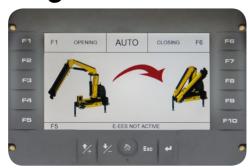

Crane lifting capacity always under control in all stabilizer positions.

After the truck has been stabilized, the operator selects the load weight to be lifted. The display shows the permitted crane outreach based on the truck stability and load selected.

- Improved efficiency
- Easy to use
- Optimised safety

Magic Touch

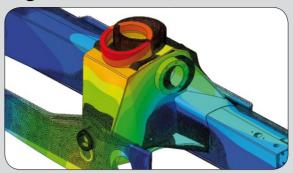

Crane Automatic folding/unfolding.

This system allows the operator to unfold the crane to a working position and fold the crane from any position to transport position by pressing a single button on the radio transmitter or display.

- Easy to start and close
- Save time
- Increased productivity and safety

High-tech development

 Structures optimised for strength, weight and speed

Top Protection

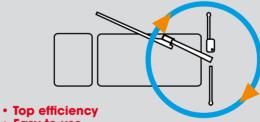

- High value retention
- Top reliability

Endless performance

Continuous rotation and extreme flexibility

Endless slewing allows the crane to be operated without restrictions. The complete access to the working area, eliminates the need to reposition the truck, optimizing precision, productivity and safety.

- Easy to use

Functional Aesthetic

Forged double linkages on column and 2nd boom

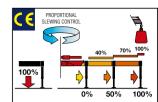

Hex Deck cover on base

Crane control system

F3XL

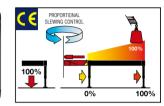

With a 3" TFT display and ergonomic keyboard, the crane operator can select optimum functional parameters. The system controls the stability with 2-step beam outreach monitoring and continuous slewing control.

F4XL+TOP

A 7" color display with integrated keyboard gives the operator a higher level of awareness of the crane operation and allows selection of the best parameters for effective use.

The system detects the exact position of the beams and proportionally calculates the stability.

Wide range Radio selection (Standard)

Hetronic Not CE

Hetronic CE Basic

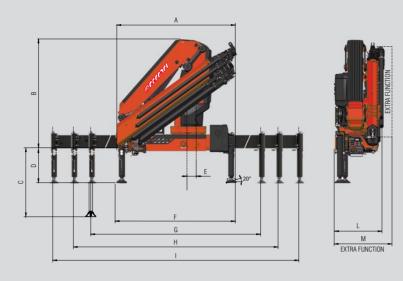

High volume oil tank made in sandwich-structured materials (PEX and PA6)

Robust column design and
